Dear Dr. Kahl:

Fitness Labs Nutrition Corporation wishes to notify the Food and Drug Administration that it has, within the past 30 days, commenced marketing a dietary supplement which bears a statement under Section 403(r)(6) of the Federal Food, Drug and Cosmetic Act.

The dietary supplement for which the statement is made is German Creatine Powder. The dietary ingredient that is the subject of the statements is Creatine. The statements read as follows.

"In the body, creatine helps to regenerate ADP (spent energy) back into ATP for increased energy output involving short, intense bursts of energy. Short term supplementation of creatine monohydrate has been shown to significantly increase muscular performance. It may help athletes workout at a higher intensity during resistance exercise. A resulting greater training stimulus over time may result in enhanced physiologic adaptations."

These statements are accompanied by the required disclaimer which is prominently displayed in bold-faced type.

This information contained in this notice is complete and accurate and the above statement is based on data which renders these statements substantiated, truthful and non-misleading.

Sincerely,
Fitness Labs Nutrition Corporation
